

TECHNIDATA IS RECRUITING A SENIOR SOFTWARE DEVELOPMENT ENGINEER

Job Opportunity ■

■ COMPANY

TECHNIDATA is a leading software developer and supplier of software applications for the clinical laboratory. The TECHNIDATA group, which is certified to ISO 9001, employs over 160 people on 3 continents with 6 subsidiaries in Europe, the United States of America and Asia. To support our worldwide expansion, TECHNIDATA is recruiting **SENIOR SOFTWARE DEVELOPMENT ENGINEERS** for its Manila-based Asian Regional Office.

■ POSITION

- Reporting to the Project Leader, you will be involved in developing projects of varying sizes, by:
 - Performing detailed designs, creating documents, and running unit tests
 - Developing software projects and running unit tests in compliance with programming rules and methods
 - Correcting software defects and implementing requests for enhancement, in compliance with quality procedures
 - Building the project folder in compliance with quality procedures
- You will also verify requests on the daily runs of build and report compilations or build errors.
- You will work on projects for validation, qualification and release, by:
 - Providing technical assistance on incidents, as requested by the Support team
 - Repairing/fixing software defects
 - Participating in the experience feedback process and suggesting enhancements
- You will support quality system improvements by proposing the application of new methods and tools.
- 6 full-time positions available.
- Location: Makati, Philippines.

■ CANDIDATE

- You have a Bachelor's degree in Engineering (Electronic/Computer/Telecommunication), Computer Science/Information Technology, Mathematics, or equivalent.
- You have at least 2 years' experience in Visual C++.
- You have at least 4 years' experience working in a related field.
