years'
EXPERIENCE IN LABORATORY
MANAGEMENT

TECHNIDATA

Laboratory efficiency
at your fingertips

TECHNIDATA is a leading provider of software solutions for *in vitro* diagnostics.

With 30 years of experience and expertise, TECHNIDATA is a major player in the field of information and **data management solutions for medical laboratories and biobanks.**

TECHNIDATA is an international company and subsidiary of Total Specific Solutions/ Constellation Software - the world's leading vertical software company.

We are present [in more than 25 countries](#) thanks to our subsidiaries and distribution networks.

Our offering consists of Laboratory Information Management Systems (LIMS), middleware solutions, and requests and result servers.

We provide standard solutions plus a wide range of services, from consulting to complete turnkey project management and customer support.

DEDICATED SOFTWARE SOLUTIONS FOR EACH CLINICAL LABORATORY DISCIPLINE

Our software and services are suitable for all laboratory structures. They are designed for [large multidisciplinary and multi-site organisations](#) as well as for smaller structures that specialise in a single discipline.

Our customers consist of public and university training hospitals, private institutions, and research centres.

Our software is designed to manage complex workflows, transmit information in real time for rapid and secure result production, and support clinical decision-making processes.

Our solutions [cover all major laboratory disciplines](#). From Biochemistry, Haematology, Immunology, Virology, Microbiology, Cellular Pathology, Genetics, Blood Banking, and Biobanking, TECHNIDATA helps you [achieve optimal laboratory efficiency](#).

YOUR BUSINESS PARTNER

Over the years, we have worked alongside customers to improve the quality of patient care, optimise laboratory efficiency, and achieve a competitive edge.

“Our primary mission is to develop and supply innovative and customised solutions to clinical laboratories.

We support our clients in achieving their objectives for efficiency, diagnostic expertise, and patient safety.”

Olivier DE KORTE, Chief Executive Officer

We believe in a future where our solutions enhance healthcare systems, where patients remain top priority, and where personalised care and precision medicine prevail.

We are committed to adding value to the data we process and making it readily available to healthcare professionals.

OUR VALUES

Respect, Quality and Passion are the founding values on which our business is based.

RESPECT

- Respect for and from everyone, including respect for differences and abilities
- Respect for the missions we undertake
- Recognition for work carried out
- Understanding customers and their needs
- Meeting the commitments we make

QUALITY

- A source of added value
- A catalyst for gaining the respect of our customers and competitors
- A source of pride for everyone
- Quality in our understanding and knowledge of customers and markets
- Quality in our procedures and methodologies, products and services, for optimal customer satisfaction

PASSION

- Genuine interest in the professions in which our products are used, both now and in the future
- Contribution to the health of others, and mindfulness of our responsibilities
- Perseverance and standing up for what is right
- Satisfaction of a job well done
- Enthusiasm and continuous improvement

covering all disciplines

UNDERSTANDING YOUR PROJECTS TODAY AND ANTICIPATING YOUR NEEDS FOR TOMORROW

Customer-focused Mindset

We work in **close collaboration with customers** to ensure our solutions evolve with their expectations.

Stability and Reliability

With more than 30 years of expertise, TECHNIDATA is a **long-term LIMS provider**. As a **responsive and sustainable partner**, we provide customers with the **reliability** they expect in demanding patient care environments.

Quality and Safety

Our products are developed in accordance with **ISO 9001 and ISO 13485 quality management systems**. This reinforces our commitment to **meeting customer expectations and ensures the highest levels of quality and safety**.

Global Presence, Local Contacts

Targeting international markets, our solutions are distributed in more than **25 countries** through a **vast network of subsidiaries and selected partners**, all experts in the specific needs of their territories.

Solid R&D Investment Policies

Thanks to **dynamic and sustained R&D investment strategies**, we use advanced development processes to offer our customers state-of-the-art products.

SOLUTIONS

For comprehensive laboratory management, TECHNIDATA offers business solutions adapted to the specific needs of a range of medical specialties such as general pathology, microbiology, genetics, etc.

Our modular and integrated solutions anticipate technological advances and the growing field of personalised medicine.

CLINICAL PATHOLOGY

^{TD}NexLabs

Enhance organisational performance and the quality of care with a new generation of laboratory information management systems designed for clinical laboratories specialising in Biochemistry, Haematology, Immunology, Microbiology, Virology and Serology.

^{TD}BactiLink

Stand-alone middleware, for microbiology laboratories wishing to implement **efficient paperless organisation and workflows, without having to change their LIMS.**

^{TD}HistoCyto

CELLULAR PATHOLOGY

Software designed for the specific needs of cellular pathology laboratories. Optimised processing for **improved efficiency, traceability, and patient safety.**

^{TD}Genet

A solution that provides **efficient and flexible responses** for genetics labs - including Molecular Genetics, Cytogenetics and Clinical Genetics. For enhanced patient monitoring and care, this solution centralises Genetics data collected from various sources for **enhanced traceability.**

SPECIMEN BANKING

^{TD} BioBank

A software solution designed to meet the specific requirements of biobanks. The solution **adds value to biological specimens, guarantees high levels of traceability, promotes scientific collaboration, and manages specimen-related logistics.**

Software to provide blood banks with a complete solution **from the reception of blood products to the consolidation of transfusion information.**

ADDITIONAL MODULES

To meet all laboratory needs, our range of software is completed by a set of complementary modules.

 Mind

Middleware – Interface tool for instruments. An integrated and unique solution for quality control and management of result production.

 Microbiology

An integrated module specifically dedicated to microbiology offering customisable analytical protocols, a system of expert rules, real-time alerts, and an epidemiology module. It additionally allows you to implement a paperless microbiology system with advanced traceability features.

 Business
Intelligence

A business intelligence tool that provides laboratories with valuable indicators to exploit their laboratory and clinical data, as well as billing.

 Web

Order comms and result consultation.

A software solution for simple order creation, optimised collection management, and real-time access to results at the patient's bedside.

 Patient

Patient result server. Allows patients to view and download their own test results from a secure website.

OUR SERVICES

A TEAM OF EXPERTS AT YOUR SERVICE

As a software publisher, TECHNIDATA guarantees the design, distribution, installation and maintenance of its solutions. We also pay particular attention to the quality of all associated services.

From consulting to full project management, training and technical support, we offer a wide range of professional services to both our end customers and distributors.

CUSTOMER SATISFACTION IS OUR TOP PRIORITY

24/7 Hotline Support

Thanks to our international presence, we provide a 24/7 service.

Hotline support is provided from 3 locations: Philippines/France/Canada.

Project management and coaching

TECHNIDATA offers consulting services to support your teams with project management.

Our consultants will work with you to optimise your workflows, interface your LIMS, and evaluate your hardware configuration.

Assistance with Laboratory Accreditation

TECHNIDATA does everything possible to facilitate accreditation processes associated with ISO 15189 and ISO 20387.

Our software offers many features that help meet regulatory requirements. Our teams offer personalised support throughout accreditation processes.

Approved training centre

Quality training is an essential element to ensure the proper use of our solutions. Training additionally guarantees greater autonomy in laboratory management. Our trainers are experts in their fields.

TECHNIDATA is a registered and approved training organisation.

RELIABILITY

TECHNIDATA is proud to support laboratories of all sizes and disciplines. **More than 650 customers** have partnered with us across the world and trust in our expertise.

THESE CUSTOMERS INCLUDE:

UNITED KINGDOM

- NHS Lanarkshire
- University Hospitals of Morecambe Bay – NHS Foundation Trust
- Princess Alexandra Hospital, Harlow
- Princess Elizabeth Hospital, Guernsey
- The Christie – NHS Foundation Trust

FRANCE

- CHU Caen
- CHU Grenoble Alpes
- CHU Rennes
- CH Anancy Genevois
- GCS 28
- GCS 85

ITALY

- Ospedale Universitario di Padova
- CeSI-MeT Università degli studi “G. d’Annunzio” Chieti-Pescara

CANADA

- CHU de Québec-Université Laval

SINGAPORE

- National Healthcare Group
- Changi Hospital

PHILIPPINES

- The Medical City – Ortigas
- The Medical City Clinics – ProSer
- St. Luke’s Medical Center – Quezon City

TAIWAN

- Tri-Service General Hospital
- Mackay Memorial Hospitals
- Far Eastern Memorial Hospital

THAILAND

- Siriraj Medical Research Center (Mahidol University)
- Srinagarind Hospital (Khonkaen University)
- National Cancer Institute
