BOOST YOUR LABORATORY'S PERFORMANCE WITH OUR DIGITAL SOLUTIONS

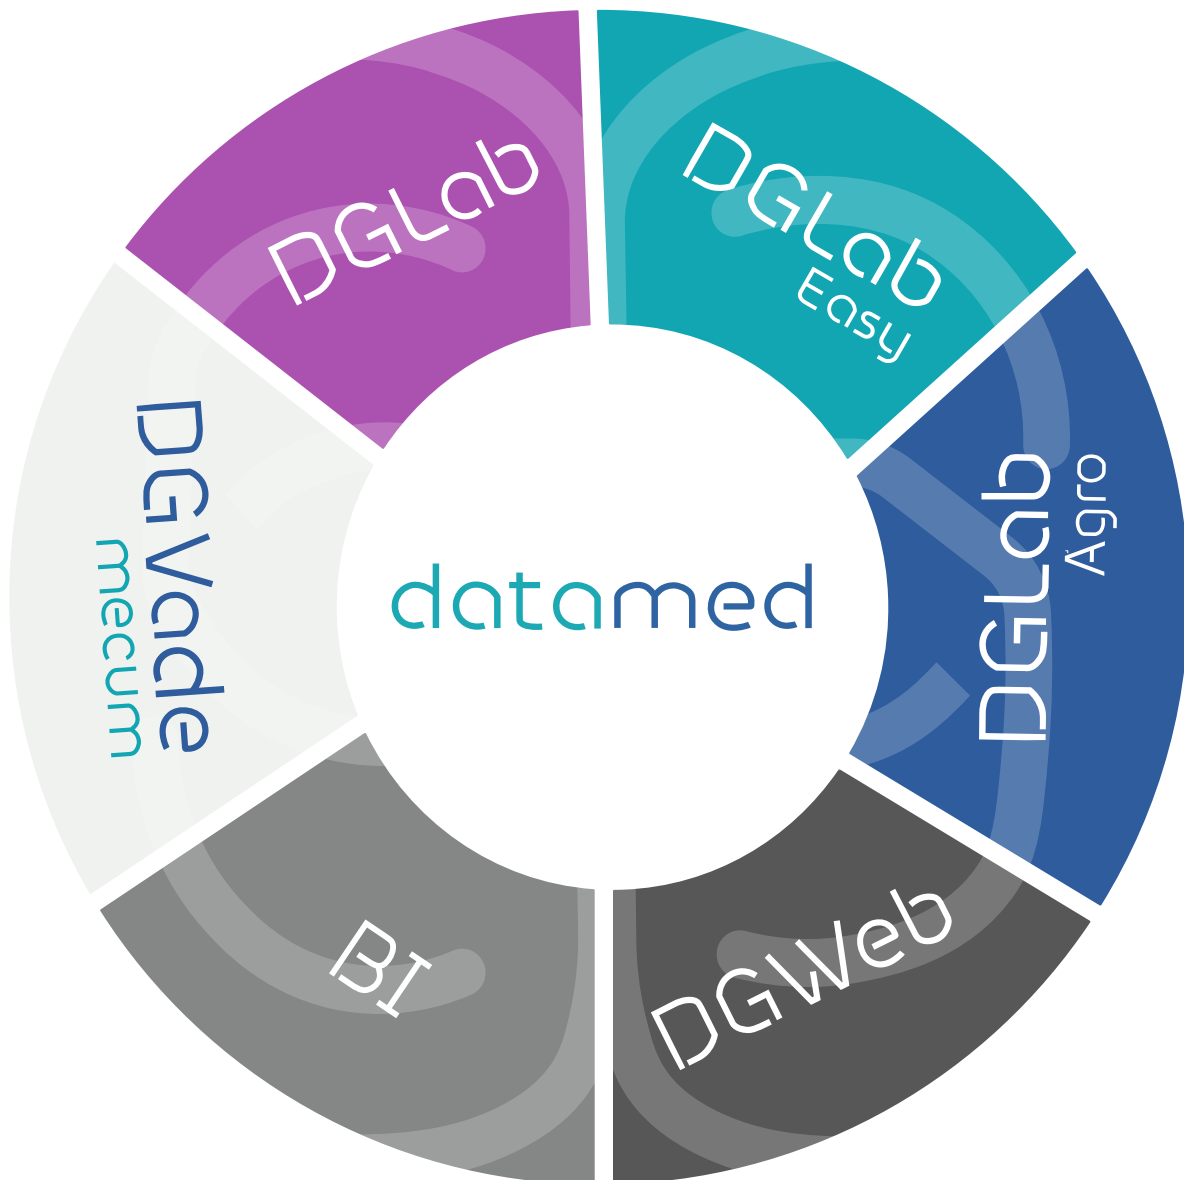

We specialise in creating modular, highly configurable information **systems** that **simplify** laboratory analytical processes.

Combining complementary skills in **medicine, biochemistry, biology, IT and economics**, our team of specialists knows and understands your workflows.

With our **flexible DGLab solutions**, we cover your essential needs as well as your specific needs. Your data flows are represented **clearly and concisely**.

Our application software, tailored to the specific needs of **medical, environmental and food analysis**, supports your laboratory testing processes.

DGLab

- More efficient laboratory processes thanks to digitisation
- High degree of configurability and flexibility
- High level of data confidentiality protection
- Wide coverage in Swiss hospitals

DGLab Easy

- Ready-to-use software that makes daily work easier
- Quick and easy deployment
- Minimal investment in time and cost
- Facing up to the increasing digitisation in the healthcare sector
- Available in SaaS version

DGLab Agro

- LIS adapted to the specific needs of the food analysis sector
- Efficient management of laboratory processes
- Powerful and stable software
- Available in SaaS version

DGWeb

- Standardised procedures
- Real-time monitoring of analysis status
- View results online via the results server
- Interoperability with significant LIS

DGVade mecum

- Showcase for the analysis catalogue
- Information managed by the laboratory in DGLab
- Great flexibility in the content and quality of the information presented
- Catalogue available to all laboratory partners

BI

- Provide you with dashboard and reports with your data
- Consolidates and uses several data sources at the same time
- Anticipating opportunities and risks
