

Enter the era of Digital Pathology

The new digital pathology interface available in ^{TD}HistoCyto gives you quick and easy access to virtual slide trays. Thanks to optimum integration, you can read your slides directly from the patient file, for faster, more efficient patient management.

ACCESS YOUR DIGITAL PATHOLOGY SOLUTION DIRECTLY FROM YOUR LIS

With ^{TD}HistoCyto, TECHNIDATA is facilitating the digital transformation of cellular pathology laboratories. Compatible with all Image Management Systems (IMS) on the market, ^{TD}HistoCyto allows you to:

- Avoid duplication, and create your image files automatically
- Create an ergonomic work list to replace physical slide trays as part of the laboratory's digitization process
- Benefit from exhaustive traceability of actions
- Interpret virtual slides and validate reports both on site and remotely
- Automatically select the Hamamatsu scanning profile

^{TD}HistoCyto > IMS
HL7 transmission of
request-related data

IMS > ^{TD}HistoCyto
HL7 notifications
of new images

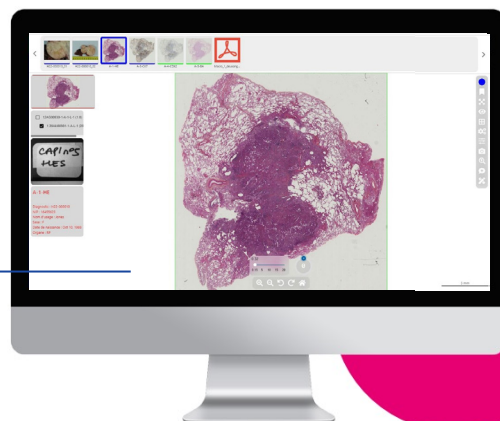

^{TD}HistoCyto
Indicator for available
images in the IMS

^{TD}HistoCyto
View images from ^{TD}HC
using the IMS Viewer

When an image is available
the IMS notifies ^{TD}HistoCyto.
An indicator is displayed.

When the pathologist accesses a
request on ^{TD}HistoCyto, the viewer
is automatically opened, displaying
the images and virtual slides for that
request.
