

Business Intelligence

Business Intelligence

- Data transformation using ETL (Extract Transform Load) to ensure data consistency
- A fully documented data warehouse populated with all usable ^{TP}NexLabs data
- Compatible with data viewing tools like Qlik, BO, PowerBI, and Tableau
- Predefined reports produced using Microsoft PowerBI and developed by our BI specialists in collaboration with TECHNIDATA users
- Optimised for rapid implementation (warehouse built from your database)
- Consolidated and reconciled data from multi-sources

WHY CHOOSE A BI*

SOLUTION?

Advantages

- Retrieve detailed laboratory data for analysis
- Present data in the form of reports, dashboards, and indicators

*BI = Business Intelligence

Service
improvement

Cost

Better
patient care

WHAT IS BI?

Applications, infrastructure, tools and practices to provide access to information, and enable analysis of that information for better organisational decision-making and performance.

- + **Autonomy and control in the use of your data**
- + **Remote access to laboratory indicators via smartphone or tablet**
- + **Controlled access for all authorised users in an organisation**

LABORATORY CONTROL & DECISION-MAKING TOOL

Turn your data into fast and strategic decision making

A graphical tool to visualise medical, financial and laboratory activity data.

Evaluate laboratory production

Monitor financial ratios

Exploit medical data
