

PRESS RELEASE

TECHNIDATA and Ascentry continue their partnership to provide laboratories with a complete, perfectly integrated solution.

Montbonnot, France – February 13, 2026

TECHNIDATA, a leading provider of Laboratory Information Systems (LIS), and **Ascentry**, expert in middleware solutions, are pleased to announce the renewal of their strategic partnership.

The goal is to propose a unified, efficient and secure solution for medical laboratories, which satisfies the increasingly exacting requirements related to integration, automation, regulatory compliance and quality of care.

This collaboration, which has already been verified by various projects in healthcare institutions, is based on shared ambitions: to optimize flows, improve operational performance and guarantee quality of care.

By combining TECHNIDATA's LIS experience and Ascentry's know-how in middleware, the two companies aim to assist laboratories with their digital transformation projects, by offering innovative, interconnected solutions.

"This agreement represents a key element of our project to provide ever more efficient software solutions to our customers"
Cédric GARNIER

This collaboration achieved a first milestone in January 2026 with the launch of the latest version of TDMind, Ascentry's agnostic middleware solution integrated into TECHNIDATA's LIS for medical laboratories, TDNexLabs. This major version offers several significant new features:

- Enhanced activity continuity
- Optimized integration with the laboratory's application ecosystem
- Improved ergonomics for a smooth, intuitive user experience

"This partnership is a key element of our project to provide ever more efficient software solutions to our customers and boost the growth of our two companies, both in France and abroad," declared Cédric Garnier, Managing Director of TECHNIDATA.

"We are very proud of this renewal of a partnership that began several years ago, and to support TECHNIDATA with its new projects. This partnership is also perfectly in line with our international growth strategy," added Cyril Verhille, CEO of Ascentry.

About TECHNIDATA

With over 40 years' experience and expertise, TECHNIDATA is a key player in the field of information and data management solutions for medical laboratories and biobanks.

TECHNIDATA's solutions, developed in compliance with ISO 9001, ISO 13485 and ISO 27001 quality standards, are distributed in more than 25 countries and cover all laboratory disciplines: Biochemistry, Hematology, Immunology, Microbiology, Virology, Anatomic and Cytopathology, Genetics and Biobank Management.
